NU-COAT	Nu-Coat TECHNICAL DATA SHEET				
Description	T60-P-P. 50μ 2-way bright 3 year silver polyester, PermPLUS permanent adhesive, stay flat PE liner.				
	'T-Series' bright silver polyester with a clear medium tack permanent adhesive on a stay flat PE line Primarily for window graphics. The silver is the same from both sides so ideal for two way viewing. To can be applied dry or wet and will never whiten when wet applied, even at colder temperatures. The				
	repellent' PE coated liner makes wet application easier.				
Key Features	Latex and UV printable. No adhesive milking when wet applied. Rigid polyester base does not shrink. 'Water-repellent' PE coated liner. Available up to 1530mm wide.				
Conversion	Primarily for CAD.  Prints should be left flat, uncovered for at least 4 hours prior to cutting, lamination or application.				
Precaution	With polyester films there is always a risk of leaving adhesive during removal.  Adhesive residue is reduced if wet application is used.  For application to flat surfaces only.				
Application	Wet application is highly recommended.				
Compliance	REACH and RoHS compliant				
Fire Certification	Not Applicable

consequential loss.

performance and reliability are not compromised by determining the suitability of each product prior to its intended use. Prolonged exposure to high and low temperatures in the presence of chemicals such as solvents, acids etc. may eventually cause deterioration. Actual performance will depend on substrate preparation, exposure conditions and correct application. For further information on the test methods used
